

INVITATION TO BID

P520 Distribution Switchgear NAS JRB New Orleans, LA

EMR, Inc. is a General Contractor that has been awarded a Multiple Award Construction Contract (MACC) Indefinite Delivery Indefinite Quantity (IDIQ) for the NAVFAC Medium MACC TX, LA, MS. We are among a small group of General Contractors who have been selected to provide proposals for this MACC.

EMR, Inc. would like to extend an invitation to receive pricing from your company. A general description of the project is provided along with document access, important dates and project/bid requirements.

Project Number: N69450-23-R-DC18
Project Name: P520 Distribution Switchgear
Project Location: NAS JRB New Orleans, LA

GENERAL DESCRIPTION

The work includes replacing the existing 15kV switchgear with new 15kV metal-clad switchgear in a control house at a different location within the base, and new 15kV cables for the existing five 15kV distribution feeders using HDD installation, and incidental related work. The work includes relocating Entergy service (primary and backup feed) to new location. New switchgear is equipped with protective relays and AMI meters for each main and feeder breaker, with provisions to monitor parameters at the control station. New control house is equipped with HVAC and ventilation systems, battery system, fire alarm, lighting, and lightning protection system. The work includes concrete foundation on augered cast-in-place piles for the control house, site grading, paving, parking, and fencing around the new control house. Please refer to RFP documents for additional information.
